    <h1>Dynamic Webpage Demo</h1>

    <!-- Content Section -->
    <div id="contentBox">
        <p id="text">Click the button to change this content.</p>
    </div>
```

```html
<!-- Buttons -->
<button onclick="changeContent()">Change Content (DOM)</button>
<button id="hideBtn">Hide</button>
<button id="showBtn">Show</button>
<button id="toggleBtn">Toggle</button>
<button id="animateBtn">Animate</button>

<!-- Animated Box -->
<div id="animateBox"></div>

<script>
    // ----------------------------
    // JavaScript DOM Manipulation
    // ----------------------------
    function changeContent() {
        document.getElementById("text").innerHTML =
            "🎉 The content has been updated dynamically using JavaScript DOM!";
    }

    // ----------------------------
    // jQuery Effects
    // ----------------------------
    $(document).ready(function () {

        // Hide effect
        $("#hideBtn").click(function () {
            $("#contentBox").hide(1000);
        });

        // Show effect
        $("#showBtn").click(function () {
            $("#contentBox").show(1000);
        });

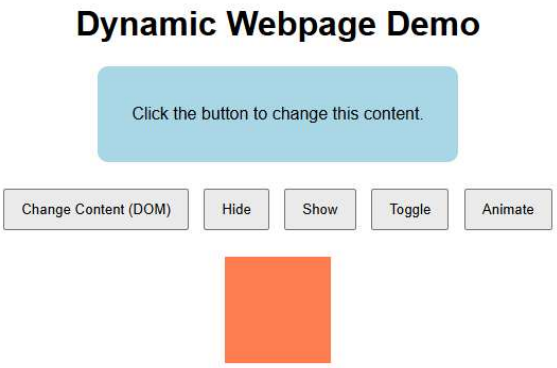
        // Toggle effect
        $("#toggleBtn").click(function () {
            $("#contentBox").toggle(1000);
        });

        // Animate effect
        $("#animateBtn").click(function () {
            $("#animateBox").animate({
                left: '200px',
                height: '150px',
                width: '150px',
                opacity: '0.5'
            }, 1000).animate({
                left: '0px',
                height: '100px',
                width: '100px',
                opacity: '1'
            }, 1000);
        });
```

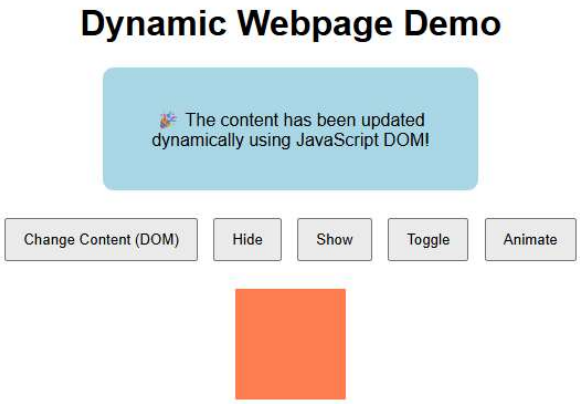
```
        });
    </script>

</body>
</html>
```

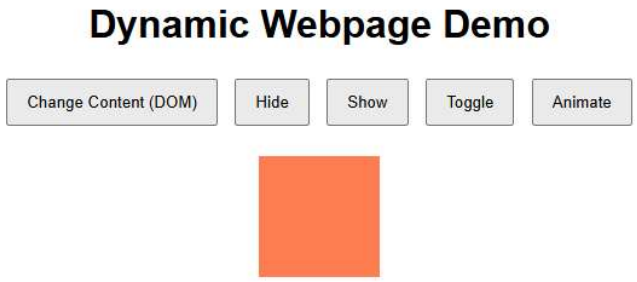
Output -



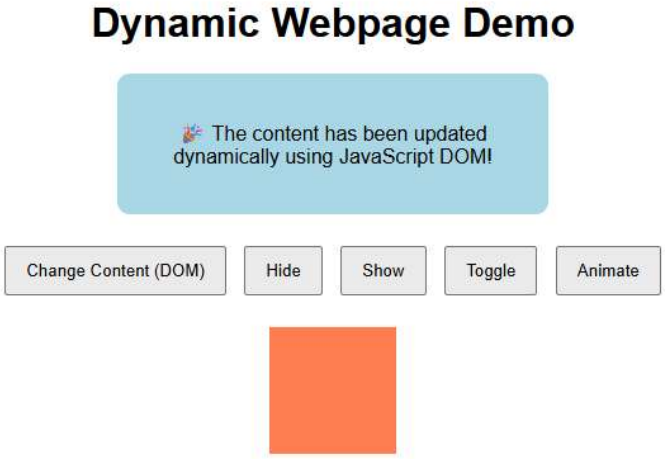
So when we click on Change Content (DOM) Button then The content in the Light Blue box get change.



And when we click on the Hide Button Content Box get disappears in 1000ms .



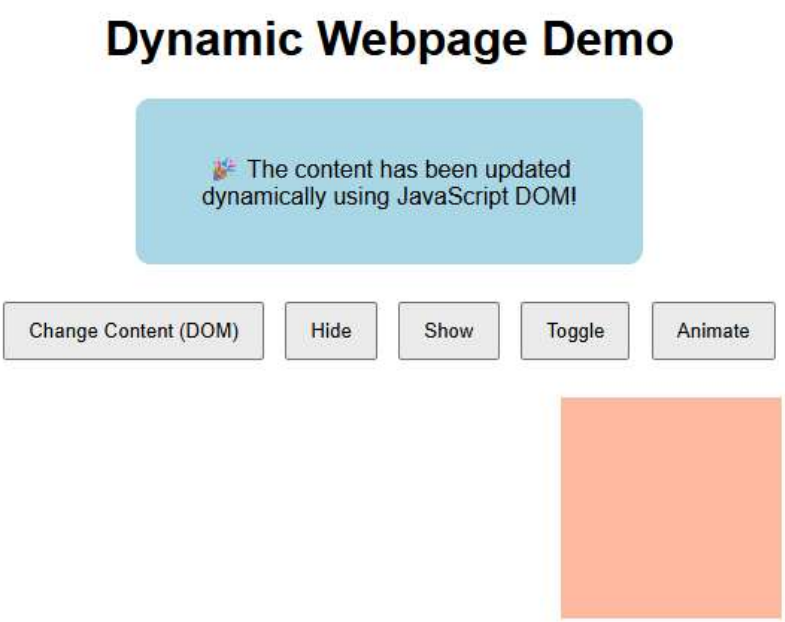
And when we click on the show button it makes the box reappear smoothly in 1 second.



And when we click on toggle button

- If visible → hide
- If hidden → show

And when we click on Animate Button -



Step 1 (First 1 second):

- Moves right (`left: 200px`)
- Increases size
- Reduces opacity

Step 2 (Next 1 second):

- Moves back to original position
- Returns to original size
- Restores opacity
